Vamshi Krishna

Software Engineer

+1 (913) 326-7373 | vamshikrishna2297@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with 5 years of experience building and supporting applications across healthcare, financial services, and enterprise domains in Agile team environments. Experienced working with Java and Spring Boot to develop REST and GraphQL APIs, contribute to frontend development using Angular and React, and manage data across relational and NoSQL databases. Familiar with AWS deployments using Docker and CI/CD pipelines, implemented OAuth 2.0 and JWT-based security, and collaborated on Kafka-driven event systems. Also contributed to AI-assisted features integrating OpenAI APIs as part of team-level initiatives. Comfortable picking up new tools quickly, writing clean and testable code, and working closely with cross-functional teams to deliver reliable software.

TECHNICAL SKILLS

Languages & Frameworks: Java, Spring Boot, Spring Data JPA, Python, JavaScript, TypeScript, C#
Web & Frontend: Angular, React.js, HTML5, CSS3, Bootstrap, Tailwind, Next.js
Databases & ORM: Oracle, PostgreSQL, MySQL, MongoDB, DynamoDB, Hibernate, JPA, JDBC
Cloud & DevOps: AWS (EC2, ECS, Lambda, S3), Azure, Docker, Kubernetes, Jenkins, Terraform, CI/CD
AI & Data: OpenAI API, Gemini, Claude, LLM Summarization, AI Chatbot, Anomaly Detection, Python Pipelines, Power BI, Excel
Tools & Testing: Git, GitHub, Maven, SonarQube, Apache Kafka, JIRA, Postman, JUnit, Jest, GitHub Copilot

PROFESSIONAL EXPERIENCE

CVS Health | *Software Engineer* **Feb 2025 – Present| Texas, USA**

Claims Management Dashboard – *Java, Spring Boot, React.js, REST APIs, GraphQL, AWS ECS, RDS.*

- Worked on Java Spring Boot REST and GraphQL APIs to support claims processing workflows as part of sprint-based feature delivery.
- Built React.js dashboard components using reusable patterns and structured state management, helping maintain UI consistency across features.
- Wrote and optimized SQL queries on Amazon RDS and worked with NoSQL data stores to handle both structured and semi-structured data.
- Assisted to deploy containerized Spring Boot services on AWS ECS through CI/CD pipelines and set up CloudWatch monitoring for better visibility.
- Worked with Kafka-based event flows and WebSocket connections to support real-time claim status updates.
- Integrated third-party financial data providers using REST APIs and event-driven patterns, which helped reduce onboarding time for new data sources by 60%.
- Contributed to an AI integration layer connecting OpenAI APIs with internal claims systems, working with REST/GraphQL endpoints and OAuth 2.0 authentication patterns.
- Implemented JWT-based role-based access control integrated with AWS IAM to secure application endpoints.
- Participated in team workflows using GitHub Copilot to assist with code quality and refactoring tasks.

Mphasis | *Software Engineer* **Feb 2021 – July 2023 | Pune, India**

Digital Banking Modernization – *Java, Spring Boot, C#, Angular, REST APIs, OAuth 2.0, Oracle, PostgreSQL, AWS EKS.*

- Deveoped Java Spring Boot REST APIs and helped implement business logic in C# (.NET Core) as POC for integration across internal banking systems.
- Built Angular UI modules with state-driven components and responsive layouts to support consistent user experiences.
- Implemented OAuth 2.0 and JWT-based authentication for secure access in compliance-driven banking environments.
- Worked with Oracle and PostgreSQL databases on Amazon RDS and helped containerize services using Docker, supporting Jenkins CI/CD deployments.
- Wrote and tuned SQL queries for reporting and data retrieval tasks used by downstream consumers.
- Tested API reliability using JUnit and Postman, and monitored deployments using CloudWatch.
- Participated in code reviews and contributed to technical documentation to help maintain coding standards.

Covantech Pvt Ltd | *Associate Software Engineer* **Aug 2019 – Jan 2021 | Hyderabad, India**

Healthcare CRM Platform Modernization – *Python, Selenium WebDriver, REST APIs, Kafka, AWS ECS, Oracle, MongoDB.*

- Built a Java-based Selenium WebDriver automation framework to reduce manual regression testing and improve test repeatability.
- Wrote automated REST API tests using Java REST Assured and JUnit to improve backend verification coverage.
- Helped validate Kafka message streams by checking event flow and data consistency across distributed services.
- Integrated smoke and regression test suites into Jenkins pipelines to support Docker-based deployments on AWS ECS.
- Wrote Java utilities for parsing XML and CSV files and verified data across Oracle and MongoDB for data integrity purposes.

PROJECTS

Future Job Fit | *AI Resume Creation & Job Optimization Platform*

React, TypeScript, Supabase Edge Functions, Public LLM APIs (Gemini/OpenAI), Python (Pyodide), Node.js

- Developed a full-stack application for resume creation and job alignment, implementing ATS-style keyword extraction and skill mapping workflows.
- Implemented a pluggable LLM integration layer using Gemini and OpenAI via Supabase Edge Functions, supporting secure server-side AI inference.
- Integrated browser-based Python (Pyodide) for resume parsing and NLP preprocessing, offloading compute-intensive processing to the client.
- Structured modular React workflows with centralized state handling to support extensible resume editing and AI features.

WanderlustTrails | *Full Stack Travel Booking Platform*

React, PHP, REST APIs, MySQL, JWT Authentication

- Built a full-stack travel booking platform using React and PHP REST APIs, supporting search, booking, review, and administrative workflows.
- Modeled relational MySQL schemas and REST endpoints with JWT-based authentication for secure user and booking access.
- Delivered backend modules for bookings, payments, blogs, and user management, ensuring transactional consistency and availability checks.

EDUCATION

Masters in Computer Information Systems, *University of Central Missouri* *Warrensburg, USA.*
